OTHER

Military service : Completed

Hesam Rasoulia

Mobile application Developer - 1997

Work History

Mobile application developer

2017 - Present

Freelancer

- Collaborated on +20 freelancing projects, with a strong focus on mobile applications utilizing Kotlin and Flutter.
- Proficiently create API endpoints using the Django framework as required by project specifications.

Android developer

2018 -2019

Servicechi / Tivan club

- Delivered two android applications written in Kotlin.
- Streamlined the replacement of outdated systems, including maps, payment methods, and notifications, contributing to overall project efficiency and effectiveness.
- Implemented the MVVM architecture to facilitate better scalability.
- I replaced Google Maps with Neshan Maps, which decreased navigation issues by 50%

PROJECTS

Flutter web application – Mantegh Company

- I redesigned a Vue.js web application with Flutter, allowing for the export of the same codebase to three different platforms.
- Designed a custom table data system with pagination and lazy loading from the ground up, bypassing the use of built-in base table classes.
- Implemented custom formatting to support input of Farsi numbers, ensuring compatibility even in the absence of a dedicated Farsi numbers keyboard in Flutter.

[Demo](#)

JobYar – Resume builder

- Developed a cross-platform online resume builder (Android & PWA) using the Flutter framework.
- All the resume templates Implemented with dart language
- Get_It and Provider libraries for dependency injection and state management

[PWA - Cafe bazaar](#)

Flutter Puzzle game

- developing an open-source puzzle game with Flutter, offering users a choice of various difficulty levels
- Proficiently managing app state through the use of the Provider package
- Demonstrated commitment to self-improvement and skill enhancement through the development of game applications, fostering a deeper understanding of algorithms, [Github](#)

Flutter E-learning application

- Developed an e-learning application encompassing both mobile app and web services, leveraging the Django framework
- Integrated bank payment functionality through the utilization of the IDPay service
- Implemented a secure authentication system based on JWT
